

ENFINITY BILLING

Keep recurring relationships in view.

For teams managing customer subscriptions, billing periods and invoice operations.

CAPABILITIES IN THE CURRENT SOURCE

01

Subscription lifecycle

Activate subscriptions, record past-due status and resume eligible subscriptions.

02

Renewal dates

Advance the subscription period and next billing date with service-level date validation.

03

Plan changes

Handle plan changes through a dedicated subscription operation.

04

Cancellation and expiry

Record cancellation separately from expiry; expiry checks the current subscription period.

One product family. Distinct business responsibilities.

Source-reviewed capabilities, not a promise that every feature is enabled in every edition or deployment.

FROM CAPABILITY TO DAILY WORK

A practical workflow.

- 1 **Activate a subscription**
- 2 **Manage its billing period**
- 3 **Renew or change plan**
- 4 **Cancel and expire when due**

WHERE THIS PRODUCT FITS

Enfinity Billing manages customer recurring-revenue workflows. It is separate from the platform service that licenses the Enfinity products themselves. Payment providers require configuration.

AVAILABILITY AND REVIEW

The capabilities described here have implementation evidence in the local Nova source reviewed on 5 September 2026. This is not a live deployment test, security certification or country-compliance sign-off. Confirm edition, configuration and acceptance criteria with the product team. Planned capabilities are excluded from the feature list.

SOURCE BASIS

Subscriptions / SubscriptionService.cs

Invoicing / InvoiceService.cs

Nova working-tree implementation. Legacy v84 PDFs were not used. Detailed file provenance accompanies this brochure collection.
