

ENFINITY COMMERCE

Stay close to every online order.

For commerce teams reviewing online orders and recording fulfilment progress.

CAPABILITIES IN THE CURRENT SOURCE

01

Order visibility

List orders by status and date range and retrieve order details.

02

Controlled status changes

Validate allowed order transitions before applying a new status.

03

Shipment records

Record carrier and tracking details for shipped or delivered orders.

04

Customer follow-through

Retrieve order confirmation data and send status notifications through the configured notification service.

One product family. Distinct business responsibilities.

Source-reviewed capabilities, not a promise that every feature is enabled in every edition or deployment.

FROM CAPABILITY TO DAILY WORK

A practical workflow.

1 Review incoming orders

2 Update fulfilment status

3 Record shipment details

4 Track completion

WHERE THIS PRODUCT FITS

Checkout, payment, tax and notification providers are deployment-dependent. Carrier and tracking records do not by themselves establish a live carrier integration.

AVAILABILITY AND REVIEW

The capabilities described here have implementation evidence in the local Nova source reviewed on 5 September 2026. This is not a live deployment test, security certification or country-compliance sign-off. Confirm edition, configuration and acceptance criteria with the product team. Planned capabilities are excluded from the feature list.

SOURCE BASIS

Orders / OrderService.cs

Nova working-tree implementation. Legacy v84 PDFs were not used. Detailed file provenance accompanies this brochure collection.
