

## ENFINITY PROJECTS

# Turn a delivery plan into visible progress.

For project teams coordinating project records, tasks, time and milestones.

## CAPABILITIES IN THE CURRENT SOURCE

01

### Project setup

Create dated projects with customer, country, currency and working-day context.

02

### Task coordination

Dedicated task services keep delivery work within the Projects product.

03

### Time and milestones

Separate time-entry and milestone services provide delivery-tracking building blocks.

04

### Status and go-live

Update project status and mark go-live through explicit lifecycle operations.

## One product family. Distinct business responsibilities.

Source-reviewed capabilities, not a promise that every feature is enabled in every edition or deployment.

## FROM CAPABILITY TO DAILY WORK

# A practical workflow.

- 1 Create the project
- 2 Organize delivery tasks
- 3 Track time and milestones
- 4 Review go-live

## WHERE THIS PRODUCT FITS

Projects owns delivery management; ERP owns accounting and general-ledger posting. Integration availability must be verified rather than assuming a shared database or automatic financial posting.

## AVAILABILITY AND REVIEW

The capabilities described here have implementation evidence in the local Nova source reviewed on 5 September 2026. This is not a live deployment test, security certification or country-compliance sign-off. Confirm edition, configuration and acceptance criteria with the product team. Planned capabilities are excluded from the feature list.

## SOURCE BASIS

Portfolio / ProjectService.cs
