

ENFINITY PROPERTY

Bring structure to the lease lifecycle.

For property teams managing contracts, renewals and related property operations.

CAPABILITIES IN THE CURRENT SOURCE

01

Contract preparation

Draft and update lease contracts before activation.

02

Active lease management

Activate contracts and mark those approaching expiry.

03

Renewals

Renew existing contracts or generate renewal records through dedicated operations.

04

Billing schedules

Retrieve contract billing schedules alongside termination and expiry operations.

One product family. Distinct business responsibilities.

Source-reviewed capabilities, not a promise that every feature is enabled in every edition or deployment.

FROM CAPABILITY TO DAILY WORK

A practical workflow.

- 1 Draft the contract
- 2 Activate the lease
- 3 Review the schedule
- 4 Renew or end the contract

WHERE THIS PRODUCT FITS

Property is the current product name. Local registration obligations, payment arrangements and accounting connections must be reviewed for each jurisdiction and deployment.

AVAILABILITY AND REVIEW

The capabilities described here have implementation evidence in the local Nova source reviewed on 5 September 2026. This is not a live deployment test, security certification or country-compliance sign-off. Confirm edition, configuration and acceptance criteria with the product team. Planned capabilities are excluded from the feature list.

SOURCE BASIS

Contracts / ContractService.cs

Properties / PropertyUnitService.cs

Maintenance / WorkOrderService.cs

Nova working-tree implementation. Legacy v84 PDFs were not used. Detailed file provenance accompanies this brochure collection.
